

How staff can remove a submission in a Canvas Turnitin Assignment

Staff can remove a submission from a Turnitin Assignment in Canvas and the paper will be removed from view:

1. In Canvas, go to the main page of the assignment and scroll down to view the Turnitin assignment inbox.
2. Enter the student's name or submission ID in the 'Search' box to locate the submission.
3. Click on the ellipsis icon (three dots) from the Options column for the submission.
4. Select 'Remove From Inbox' then 'Confirm'.

Deleting the submission in this way will not remove the paper from the Turnitin database repository so the original submission would show as a source in the Similarity report and the score could be high, however, this could be disregarded by following the [guidance on how to exclude sources](#).
