AI Resource Breakdown

Policies, guides, templates, reports, and other types of resources related to the AI hub, self-help guide, and training / development activities.

Users

Students
Including undergraduate and postgraduate learners, encompassing all disciplines and modes of study.

Staff
Including Academics alongside Education Leaders, Administrators and Support Staff.

AI Digital Infrastructure
AI tools and services, supporting school, directorate, and learner activities

AI Hub
- AI Hub Development Plan

AI Training
- AI Training/Development Plan

AI Guide
- AI Self-help Development Plan

Roadmaps, Policies and Guides

- **AI in Education Roadmap:** Timelines, goals and outcomes concerning the use of AI in education.
- **AI Values and Behaviours Policy:** Staff and student shaping values and behaviours for the use of AI.
- **AI Equity and Inclusion Policy:** Requirements ensuring equitable and inclusive use of AI for staff and students.
- **AI Accountability and Responsibility Policy:** Details of staff and student responsibilities for the use of AI, including lines of accountability.
- **AI Safety and Security Policy:** Requirements ensuring AI systems and tools are used in a safe and secure manner.
- **AI Skills Guide:** Recommended AI skills for staff and students alongside development guidance.

Horizon Reports

- **Horizon Reports - Jobs and Skills:** Known and predicted impact of AI on jobs and skills.
- **Horizon Reports - New and Emerging AI Capabilities:** Start-of-the-art and predicted near-future AI capabilities related to education.

AI in Education - Innovation Knowledge Base

- Case studies, findings, and reports on the innovative use of AI in education as well as innovative uses in improving efficiency and effectiveness within education activities.

AI in Education - Best Practice Knowledge Base

- Guidance, exemplars, and other materials detailing best practice for the use of AI in teaching, learning, assessment, and support.
- Guidance, exemplars, and other materials on the use of AI to improve efficiency and effectiveness within education activities.
- Resources supporting the development of AI skills.

AI Self-Help Guide Resources

- Guides, plans, and tools providing practical, step-by-step directions for integrating AI within teaching, learning, support, and assessment activities.

AI Horizon Scanning

Skills, jobs and education related AI capabilities horizon scanning.
- AI Horizon Scanning Strategy

AI in Education Innovation

Innovation activities exploring the use of AI within education.
